EDUCATION

Massachusetts Institute of Technology, Cambridge, MA - Class of 2023, GPA: 4.7/5.0

Computer Science and Engineering (Course 6-3) and Comparative Media Studies (Course CMS)

ACTIVITIES

Varsity Lacrosse, Schwarzman College of Computing Advisor, Infinite Magazine Editor, 2023 Ring Committee, PLEASURE Peer Educator, Alpha Phi Recruitment Team

EXPERIENCE

Viral Communications Group, MIT Media Lab - Undergraduate Researcher, Current
Systems developer for Computer-Aided Synthesis project which uses generative models and deep learning to implicitly synthesize complex objects like images and research projects

- Developed fullstack web application using React and Flask
- Implemented PyTorch machine learning model and deployed on Docker

AT&T - Systems Engineering and Architecture Intern, Summer 2021

Redesigned and optimized an antiquated user authentication microservice

- Reduced memory footprint by over 95%; written in GoLang
- Ensured service properly handled its millions of daily requests through pipeline testing

Volar, MIT Sloan Startup - Web Developer, January 2021

A founding member of this startup supporting the middle class creator economy in Latin America

- Designed and deployed fullstack web platform across language barrier

Poetic Justice Group, MIT Media Lab - Undergraduate Researcher, Summer 2020

Led the project Real Talk Radio, a generative sound stream of Black thought sampled from music

- Curated 500 song repository of spoken intros, outros, interludes, and skits
- Created a generative broadcasting system to stream and crossfade the clips
- Designed and implemented a Python-automated backend system using Google Drive API and Google Sheets as JSON endpoints

Laboratory for Social Machines, MIT Media Lab - Undergraduate Researcher, January 2020

Conducted machine learning research to predict most reportable events of personal narratives

- Created database of personal narratives through both audio and text using Python web scraping
 - Applied fundamentals of Google's PageRank algorithm to create a machine learning model that extracts most reportable events from stories
-

SKILLS

Languages: Python, GoLang, C++, SQL, Java, Javascript, HTML, CSS

Tools: Figma, Indesign, Illustrator

Development: React, Node, Flask, Heroku, Docker, Wireframing, Machine Learning Implementation, Git, Agile + Scrum Development, Unit + Functional Testing, Google Cloud Platform
